Address: Fifth Settlement, New Cairo, Egypt

**Bachelor's Degree in Media Engineering Technology, Major in Computer Science
(2020-2025)** German University in Cairo (GUC)

German International University in Berlin semester abroad, Winter 2023

International General Certificate of Secondary Education, (IGCSE)

Egyptian British International School (EBIS), Egypt, Class of
June 2020 Score: 96%

CAREER RELATED EXPERIENCES

- **Intern, Backend Developer, Bit68, August - December 2025**
 - Developed and deployed a Django REST Framework (DRF) backend for an AI-powered HR recruitment agent, enabling automated processing of candidate applications and vacancy approvals.
 - Implemented email parsing, workflow automation, and approval systems to streamline recruiter-manager interactions and reduce manual workload.
 - Integrated AI-driven decision logic and scalable REST APIs to support smart candidate screening, vacancy management, and recruiter notifications.
 - Performed in-depth system analysis, debugging, tracing, and troubleshooting of backend workflows to ensure reliability, performance, and maintainability.
- **Intern, Information Technology, Talaat Mostafa Group, July 2025**
 - Assisted in troubleshooting and maintaining enterprise hardware/software systems, improving team efficiency by reducing downtime for internal users.
 - Supported network configuration tasks and security audits, contributing to a more stable and secure internal infrastructure.
 - Gained hands-on experience with help desk ticketing systems and user support, improving response time and user satisfaction.
- **Intern, Information Technology, NewPlan developments, July 2024**
 - Worked alongside IT staff to monitor system performance and backups, ensuring data reliability and business continuity.
 - Supported the onboarding process for new employees by setting up accounts, devices, and software, helping streamline IT operations.
- **Intern, Data Analysis & FMCG, Majid Al Futtaim Group, July - September 2023**
 - Assisted in collecting and analyzing sales data from FMCG product lines, helping the team identify trends and optimize stock levels.
 - Developed Excel dashboards and reports to visualize performance KPIs, improving decision-making and cross-departmental communication.
 - Gained insight into retail and supply chain analytics in a high-paced, real-world business environment, building a strong foundation for data-driven thinking.
- **IGCSE Physics Teaching Assistant, September 2019 - June 2020**
 - Relaying course material to more than 60 high school students.
 - Responsible of exam grading.

EDUCATIONAL PROJECTS

- Graduation Project: Integration of YOLO with SNePS for Visual Reasoning
 - o Technologies: Python, Google Colab, YOLOv8, Java, JavaSnepsAPI, Eclipse, FOPL
 - o Integrated YOLOv8 (object detection) with SNePS (logical reasoning) to detect objects in images and explain them using First-Order Predicate Logic (FOPL).
 - o Used Python and Google Colab for detection; generated logic statements passed into JavaSnepsAPI via Java in Eclipse.
 - o Built an automated pipeline: running a picture in Colab directly triggers logic reasoning in Java without manual input.
 - o Project combined computer vision with symbolic AI, enabling explainable visual understanding.
- Java:
 - o Real-time computer game (Marvel) implemented with GUI
 - o Simulation of an operating system
 - o Counter sensor system implemented in lecture halls
- SQL: Building a football game system for managing teams
- HTML: Developing the front-end of an online banking system
- Node.js: Developing a travelling website
- Haskell: Implemented Minesweeper game
- Prolog: Implemented Pro wordle game
- Springboot: Implemented a robust and scalable e-commerce platform
- Cloud Solutions:
 - o Stopping Revenue Leaks with Natural Language processing
 - o Designed and deployed an event-driven AI recruiter platform on AWS
- Django: AI recruiter designed to automate the end-to-end Recruitment workflow
 - o GitHub link: <https://lnkd.in/ewWAnsaz>

COURSES

- Data Structures and Algorithms
- Object Oriented Programming
- Software Engineering and Operating Systems
- SOLID Principles & Design Patterns
- Cloud Computing & Virtualization
- Node.js, Express, MongoDB, Udemy
- Fundamentals of Agile Project Management, PMI
- Fundamentals of Waterfall Project Management, PMI
- REST API with Python & Django
- PostgreSQL

COMPUTER AND LINGUISTIC ABILITIES

- Programming languages/concepts & Operating System(s): Python, Java, Javascript, C/C++, SQL, VHDL, Haskell, Prolog, OOP, Data structures, Design Patterns, APIs & Networking, Shell Scripting, Linux OS
- Tools: Cisco packet tracer, Visual Studio code, Eclipse IDE, IntelliJ IDEA, cursor, Docker Desktop
- Microsoft Office package
- Languages:
 - o Arabic: Mother-tongue
 - o English: Fluent
 - o German: Basic
